Homework 3: due Friday October 23 in class

General instructions:

1. A paper copy of your solutions to the following exercises must be turned in in class on Friday October 23 in class, **late homework is not accepted!**

2. Please make sure you have download (from the course website) the most recent version of the chapter from which the exercises are taken!

3. You do not need to turn in any code, only turn in the requested items listed in each exercise.

4. Please write your netid (*not* your student id number) on your homework.

Chapter 4 exercises:

Please complete exercises 3, 5, 9, 10, and 12 and hand in the code you write for exercises 9 and 10.

Note that in each dataset csv file the data is contained in the first N columns, with corresponding labels given in the final column of the file.
